

WORKARMA

40CM SLEEVE ULTRA CUT RESISTANT SLEEVE

FEATURES

- Tested against EN ISO 21420:2020 - General Requirements and Test Methods
- Tested against EN 388:2016+A1:2018 - Protection Against Mechanical Risks
- 13 gauge nylon/HPPE/spandex/steel fibre cut F liner
- Hook and loop closure
- 40cm long for extended protection
- OSFA

AVAILABLE RANGE

PART NUMBER	SIZE	PACK QTY
GA13F00L092	OSFA	1 Pair

WORKARMA

40CM SLEEVE ULTRA CUT RESISTANT SLEEVE Hand Protection

TEST AND CERTIFICATION

Tested against

- EN ISO 21420:2020 - General Requirements and Test Methods
- EN 388:2016+A1 2018 - Protection Against Mechanical Risks

EN 388:2016

234XF

TEST RESULT

STANDARD	TEST DESCRIPTION	CONFORMITY
EN 388:2016 +A1:2018	Abrasion resistance: 2016	Level 2
	Cut resistance: 2016	Level 3
	Tear strength resistance: 2016	Level 4
	Cut resistance TDM	Level F
EN ISO 21420:2020	pH - Textile (KCl solution)	Pass
	Azo-dyes	Pass

UNDERSTANDING PROTECTION AGAINST MECHANICAL HAZARDS (EN 388:2016 +A1:2018)

Protection against mechanical hazards is symbolised by a pictogram followed by four numbers (performance levels) then two letters. For the first 4 positions the higher the number, the higher the level of protection. For the 5th position, the TDM cut test, A to F will be awarded for each gloves test result, with A being the lower score and F being the highest score. The letter P in the six position (if applicable) is for gloves certified to provide impact protection.

Example:

TEST	RATING RANGE	EXAMPLE RESULT
Abrasion	1-4	4
Cut (Coupe Test)	1-5	x
Tear	1-4	4
Puncture	1-4	2
Cut (TDM Test ISO 13997)	A-F	C
Impact protection	P	P

EN 388:2016
4X42CP

For dulling during the cut resistance test, the coupe test results are only indicative, while the TDM cut resistance test is the reference performance result. If there is an X in any of the positions, it means this performance metric was not tested.

The information shown in the example should be used in conjunction with the wearers own risk assessment, adequate knowledge of AS/NZS standards.

APPLICATIONS

Including but not limited to industries such as:

- Rigging
- Landscaping
- Demolition
- Mining
- Materials handling
- Construction

WORKARMA

40CM SLEEVE ULTRA CUT RESISTANT SLEEVE Hand Protection

FITTING INSTRUCTIONS

- Dry the hand and arm before putting on the sleeve
- Check that the sleeve's fit is secure around the arm and the palm
- Take sleeve off by pulling cuff back over hand

WARNINGS AND LIMITATIONS OF USE

- Wearer must complete a risk assessment to determine suitable protection required
- The selection of the right sleeve must be made according to the specific needs of the workplace, the type of risk and its environmental conditions
- Check that the sleeve does not present holes, cracks, tears, colour change etc and discard any sleeve presenting such defects
- Replace sleeves when sleeve shows signs of wear and tear
- Sleeves shall not be worn when there is a risk of entanglement by moving parts of machines
- The tested performance levels only refer to the palm side of the glove

STORAGE, SHELF LIFE AND CLEANING

- Store in a dry environment with temperatures between -5°C and +50°C
- Sunlight may cause gloves to become discoloured and lose their dexterity. Store away from direct sunlight
- Machine wash or hand wash, max 40°C then hang to dry
- Use mild or natural soaps or detergents. Do not use bleach or solvents
- Do not tumble dry or dry-clean
