WINTER LINER HARD HAT

Head Protection

UNDERSTANDING HEAD PROTECTION

Head Protection is broken into 4 main categories to determine the hard hats ability to protect the wearer from Impact and /or high heat. Hard hats generally worn in Australia and NZ are tested in accordance with AS/NZS 1801:1997, with the exception of the Bump cap, which is tested against EN 812, as demonstrated below:

TYPE	CATEGORY	DESCRIPTION
Bump	Bump Cap – EN812-2012	Suitable for use in Warehouse where protection from bumps and scrapes are required
Type 1	General industrial	Suitable for work in the construction industry, factories, and quarrying
Type 2	High Temperature workplaces	Intended to withstand exposure to high temperatures like those encountered in Steelworks
Type 3	Bush Fire fighting	Intended to be worn for those involved in Bush Firefighting

The above information should be used in conjunction with the wearers own risk assessment, adequate knowledge of AS/NZS standards.

APPLICATIONS

Including but not limited to industries such as:

- Cold climates
- Meat works
- Fisheries
- FMCG

WARNINGS AND LIMITATIONS OF USE

- Wearer must complete a risk assessment to determine suitable protection required
- Risk assessment must determine if the garment is suitable for known application/risk
- Inspect and replace garment if colour fading or degradation occurs

STORAGE, SHELF LIFE AND CLEANING

- Machine wash at 40°C using a mild detergent
- Do not iron or tumble dry
