## WELDING JACKET LEATHER SLEEVES Welding Protection

### UNDERSTANDING PROBAN

PROBAN® is a quality controlled technological process that gives cotton and cotton-rich woven and knitted textiles flame retardant properties that are durable to long term use. Articles manufactured from PROBAN® fabrics provide reliable flame retardant performance and peace of mind to industrial, institutional and end-consumers through-out the world while conforming with industry fire regulations. Moreover, PROBAN fabrics maintain their strength, colour and flame retardant protection properties when exposed to UV light and are thus perfectly suitable for outdoor work environments.

### APPLICATIONS

Including but not limited to industries such as:

- Construction
- Metal Fabrication
- Tunneling
- Steel Work
- Transport
- Mining Maintenance

### WASHING INSTRUCTIONS

- PROBAN® clothing can be washed in a conventional washing machine
- We recommend washing PROBAN® protective clothing at temperatures of up to 60°C
- Heavily stained articles can be pre-soaked (up to two hours at room temperature) in an enzymatic-type detergent if desired
- PROBAN® clothing can be ironed once washed and dried
- Users should ensure these general guidelines are considered in conjunction with manufacturer care instructions supplied with the protective clothing

### LIMITATIONS OF USE

- Wearer must complete a risk assessment to determine suitable protection required
- Risk assessment must determine if the garment is suitable for known application/risk
- Replace garment when visual signs of wear and tear

### STORAGE & SHELF LIFE

- Store the jacket in a dry, cool place when not in use
- Avoid hanging the jacket in direct sunlight or storing it in damp conditions, as this can cause the leather to deteriorate
